The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Takahashi 6,068,523. Takahashi discloses a bonding structure of plastic parts comprising: a first plastic part 20 in which a wiring board (not shown) connected to a connection terminal 24 is provided by insert-molding, said first plastic part having a holding hole 21 for holding said wiring board; a second plastic part 40 bonded to said first plastic part; wherein a surrounding of said holding hole provided in said first plastic part and a bonding face of said second plastic part to which said first plastic part is bonded are bonded to each other (at 43).
